

WHAT IS A **CASE**?

A patient has a diagnosis of COVID-19.

TAKE ACTION:

ISOLATE.

Separate from people who are not sick to avoid spreading illness.

WHAT IS A **CONTACT**?

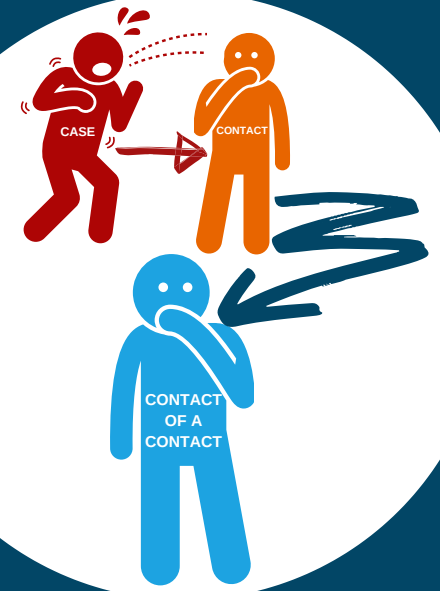

An individual had close contact (within 6 feet of the case patient for at least 15 minutes) while the case patient was infectious.

TAKE ACTION:

QUARANTINE.

Stay at home to limit community exposure to illness and to see if symptoms develop.

WHAT IS A **CONTACT OF A CONTACT**?

An individual had close contact (within 6 feet for at least 15 minutes) with a person who had contact to a case patient.

TAKE ACTION:

PREVENTATIVE ACTIONS.

Wash hands, cover coughs and sneezes, and clean surfaces frequently. Be alert for symptoms.
